EXPERIENCE

Analyst, Power System Modeling *ISO New England* June 2023-Present

- Managed a large-scale operational asset database (~4,700 assets, ~1,200 diagrams), ensuring data quality and compliance with regulatory and internal standards, and implementation of real-time operational system updates
- Served as primary contact for ~300 monthly user inquiries, resolving issues and providing guidance and training materials to improve user understanding of systems, workflows, and processes
- Coordinated system updates and testing impacting a user base of 1,600+, supporting rollout, communication, and adoption of system changes across test and production environments
- Directed annual data certification across 200+ companies in alignment with regulatory requirements

Communications Coordinator Intern *UMass Amherst* Spring 2023-2024

- Wrote and edited content for various UMass IT websites
- Accomplished mass content migration of IT website pages between content management systems (Drupal 7 and ServiceNow)
- Redesigned English Department graduate handbook, organizing complex academic policies into clear, user-friendly content later used for web-based resources (Spring 2024 Project)

Teaching Assistant *UMass Amherst* Fall 2023

- Mentored a classroom of 20+ students in FYS Economics Seminar, created and presented lectures

EDUCATION

Bachelor of Science in Managerial Economics | University of Massachusetts, Amherst May 2024

- Minor: Information Technology
- Certificate: Professional Writing and Technical Communication (PWTC)

SKILLS

- **Training & Documentation:** Articulate 360 (SME Collaboration & Course Development Support), MadCap Flare, Adobe FrameMaker, User Acceptance Testing (UAT), Process Documentation
- **Technical & Systems:** Python, HTML/CSS, SSH, Tectia Client/Server, SFTP/FTP
